

# Creation

## Creation and science: Conflicting or complementary?

### Can a Scientist believe in God?

**Your final task in this part of RE this term is to design a poster which argues BOTH sides of this question.**

Think about the last few weeks of RE we have studied, the Bible's creation story in Genesis, the scientists who are also religious, the theories that Darwin discovered, believed and wrote about (and how they may conflict with Religion)

Mind map some ideas first to organise the arguments. (Try and find 3 for EACH)

Yes a scientist can believe in God because ...

No, a scientist can not believe in God because ...
