

Can you be a Religious Scientist???

Religion and science often argue about a lot of different things. This could be how the universe was created, was it God or the Big Bang?

Does God heal people miraculously, or do medicine and natural resources heal people?

I have linked a webpage that discusses:

Are religion and science always at odds? Here are three scientists that don't think so

Copy the three questions below (IN YOUR BOOK) and answer the questions.

- 1.) How does Dr Jennifer Wiseman: A Christian astrophysicist believe Christian faith works within the universe?
- 2.) Why does Dr Andrew Harman: a Buddhist immunologist believe in Buddhism AND science?
- 3.) Fahad Ali: A Muslim geneticist believes we need a God. Why is that?
