To be able to identify plants
around school.

Today we are going to be identifying plants from around the school grounds.

Before we start, what can you all remember about plants from our learning so far?

Tell your partner.

Let's have a recap of some of the things
we have learnt this term.

Today's lesson

We are going to be going out around the school to see what plants we can identify.

What are we going to do?

- When we see a plant on our search, we are going to take a picture of it using the iPads.
- We will then come back in and use our identification sheets to see what plants we managed to find.

Extension Questions

What plants did you see growing?

What time of year are we in?

What differences do you think you would see if you came back in winter or summer?
