

LO: To plan by discussing and recording ideas.

Today is your chance to take photographs and videos for your adverts.

Think carefully about each stage on your storyboard and what would be the best picture/video clip to represent it.

For remote learning you can look at the school website to find photos or you could do some amazing drawings of the school and what you want to show.

When recording video clips, try to make them no longer than 5 seconds.

When taking photographs, you may want to take more than one for each section on your storyboard. This will give you chance to edit.
