

GALAPAGOS ISLAND ANIMALS

To identify how animals and plants are adapted to suit their environment in different ways and that adaptations may lead to evolution.

- ▶ Choose one of the animals found on the Galapagos Islands
(Pictures below / on Website)

Consider what features they show which could mean the animal has adapted and evolved to suit its environment.

Sketch a picture of the animal and colour it in accurately.

Write some information down around the animal to show your learning!

Lava gull, Genovesa Island

Giant tortoise

Galapagos sea lions

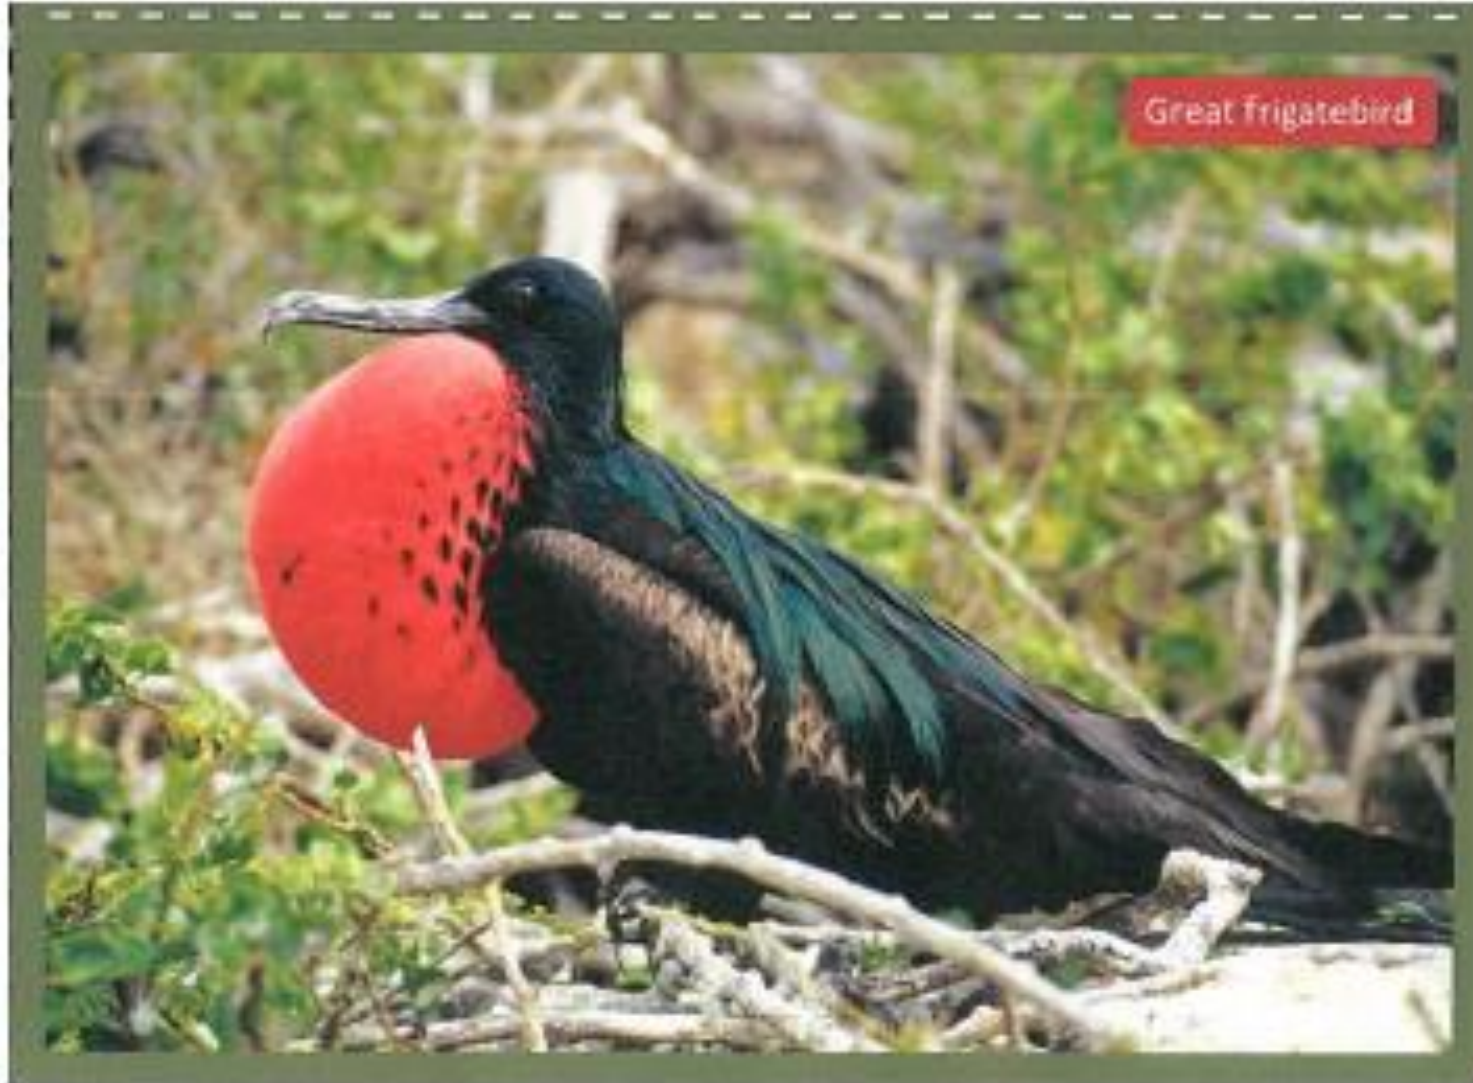

Sally Lightfoot crab, Fernandina Island

Whitetip reef shark in tropical waters

Great frigatebird

Blue-footed booby

Red-footed booby
