

Editing Sounds

It is a good idea to make notes on your sound recording and editing as you experiment. This way, you can recreate a particular effect or process by looking back over your notes. Use this sheet to organise your notes and ideas.

Effects (What is the name of the effect, what does it do and why do you like it?)	Properties What properties have you changed (e.g. speed, volume, pitch)? How did you achieve it?	Sound Files Have you recorded or found any sound files you want to use again? Where are they?
