To sequence the events of a
significant event in history

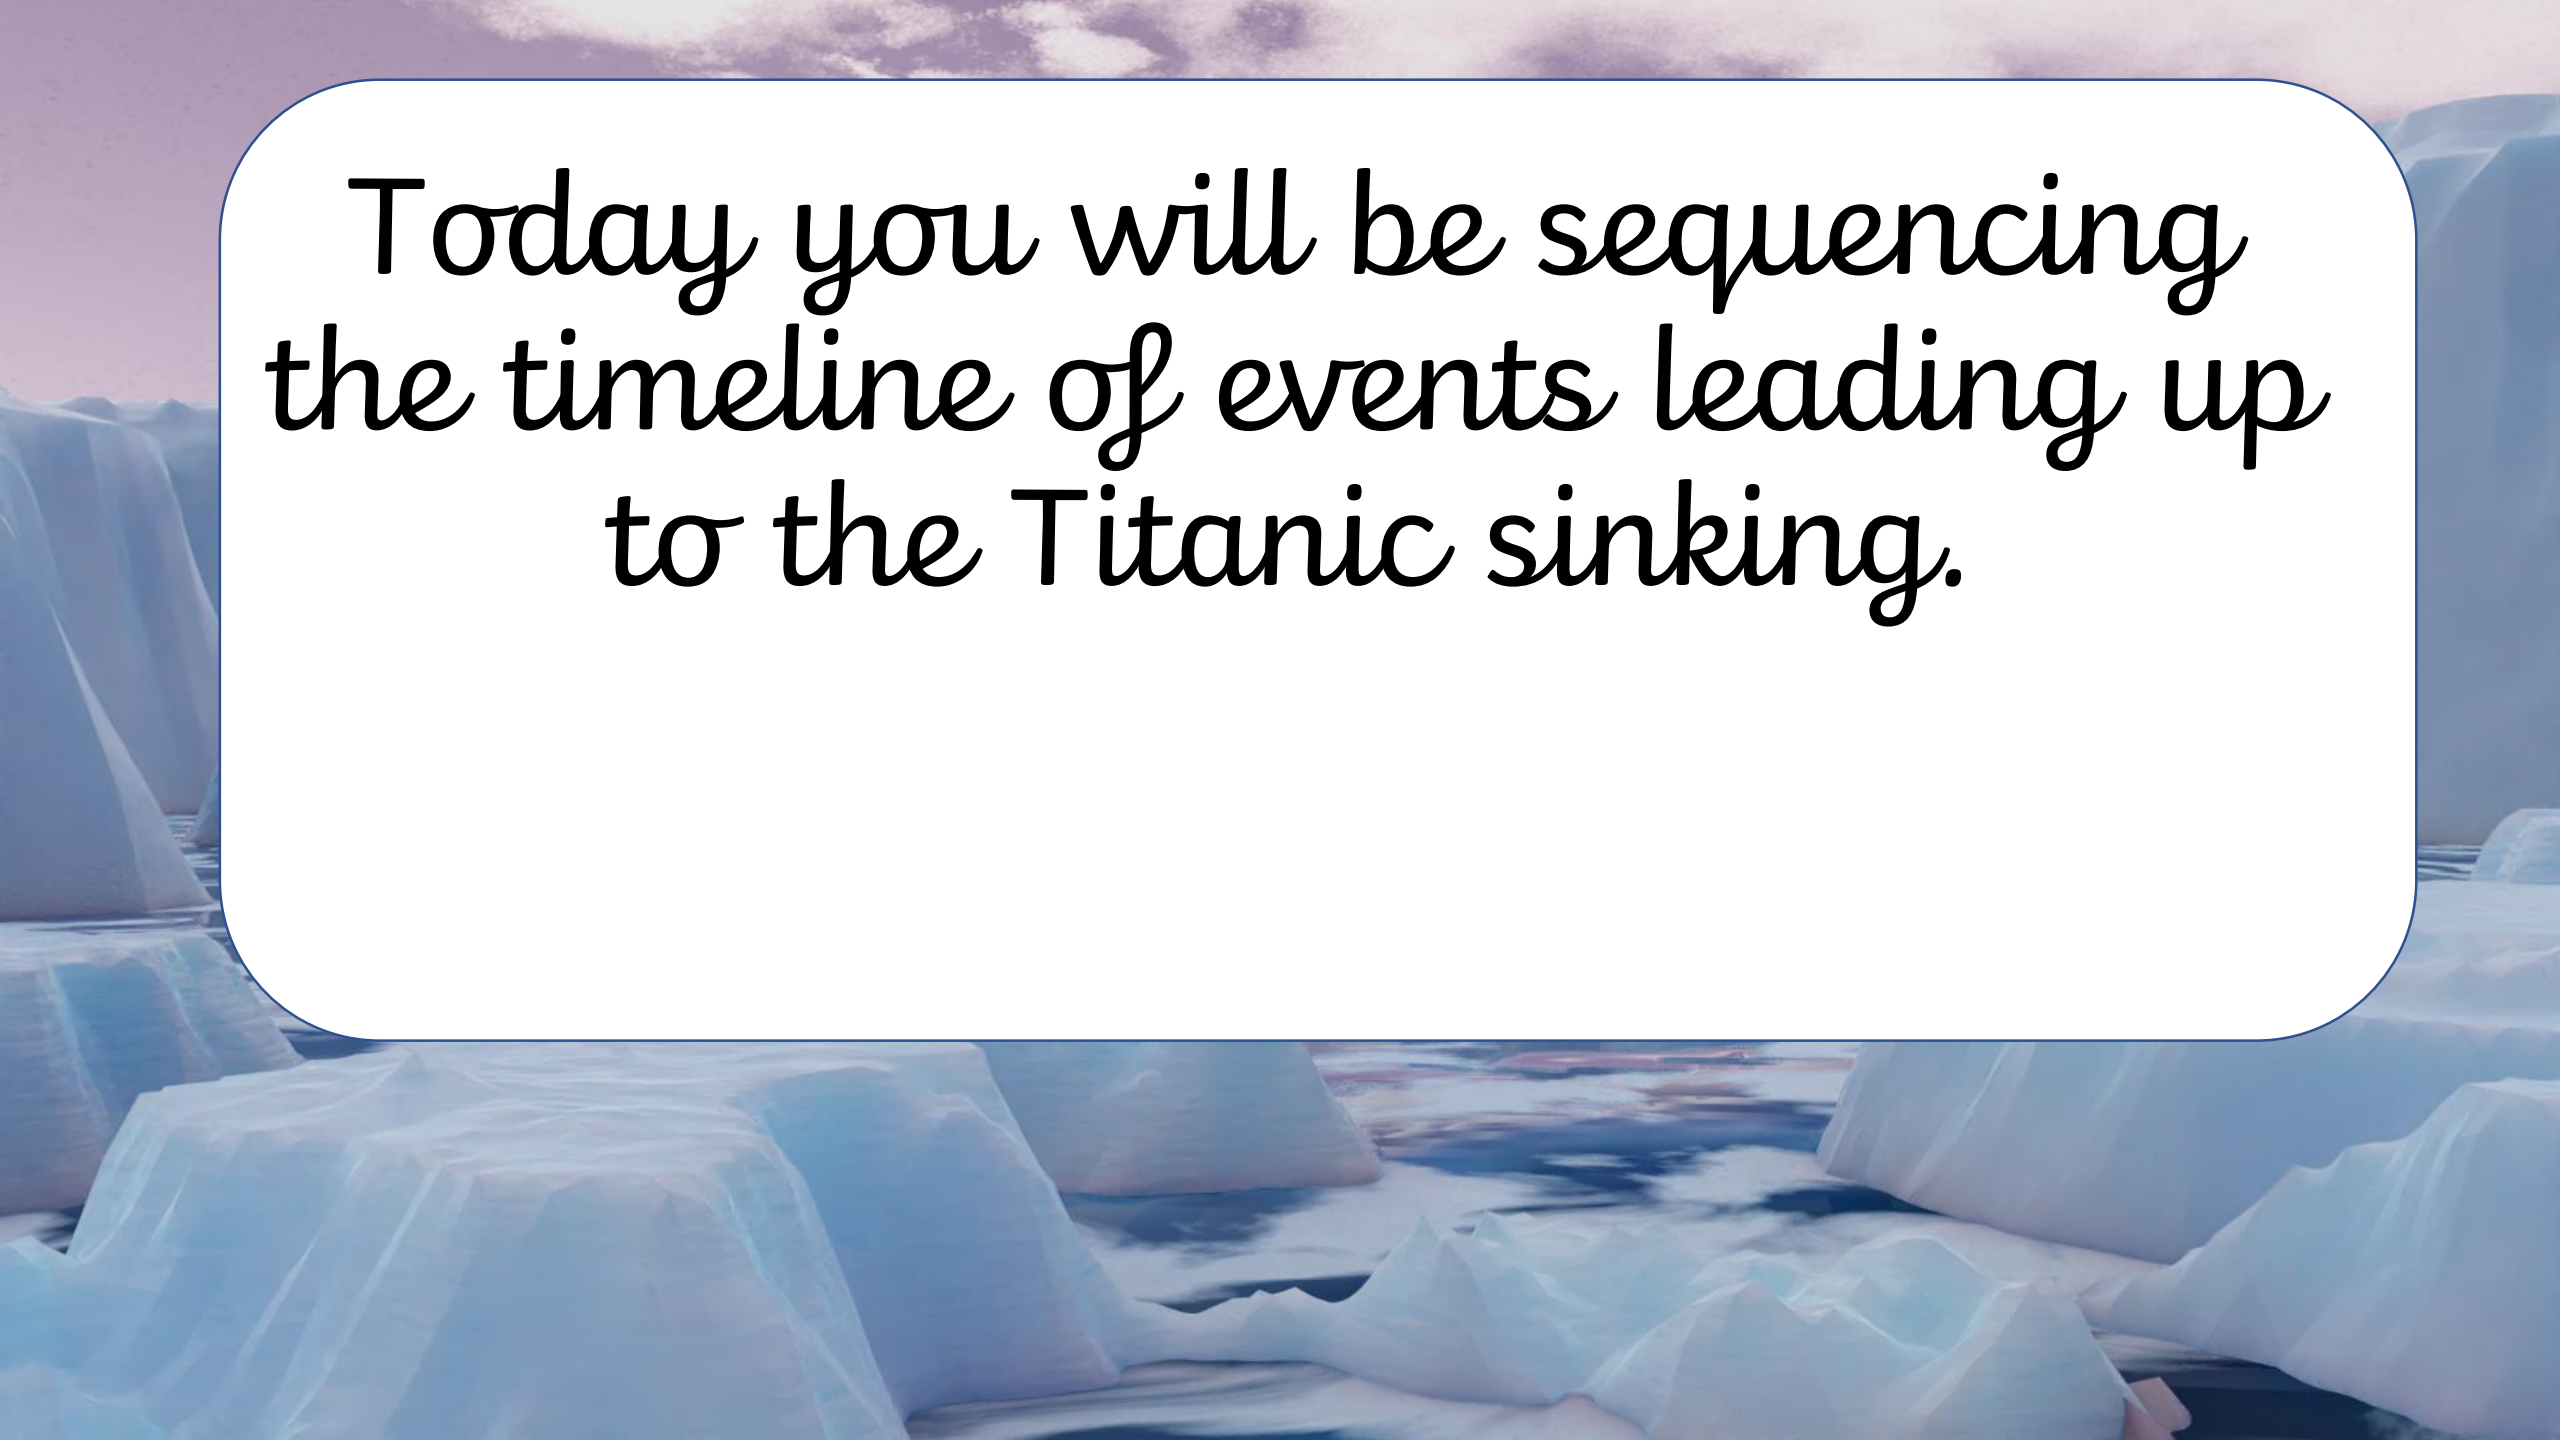

NATIONAL
GEOGRAPHIC
CHANNEL

- <https://www.youtube.com/watch?v=nFfdGUWNges&t=2s>

The background of the slide features a soft, painterly illustration of a cold, icy environment. In the foreground and middle ground, there are several large, jagged icebergs or chunks of ice floating in a body of water. The ice is rendered in shades of light blue and white, with some darker blue shadows indicating depth. The sky above is a mix of soft pinks, purples, and blues, suggesting a sunset or sunrise. The overall mood is serene yet somber, fitting the historical theme of the Titanic.

Today you will be sequencing
the timeline of events leading up
to the Titanic sinking.

The background of the slide features a serene Arctic scene. In the foreground and middle ground, several large, jagged icebergs float on a calm sea. The icebergs are rendered in shades of white and light blue, with some showing internal textures. The sky above is a soft gradient of pink, orange, and purple, suggesting a sunset or sunrise. The overall mood is peaceful and expansive.

Now you will create a storyboard to show the events in chronological order.
