

Jack in the Box Instructions

Step 1

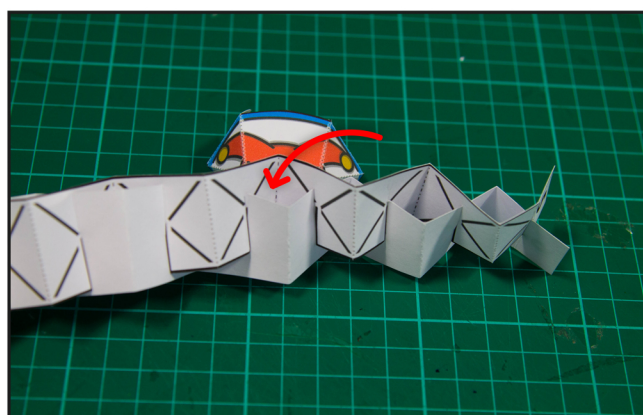

Carefully cut out the model along the solid black outline. Be sure to cut all the way along the lines as shown in the image below.

Step 2

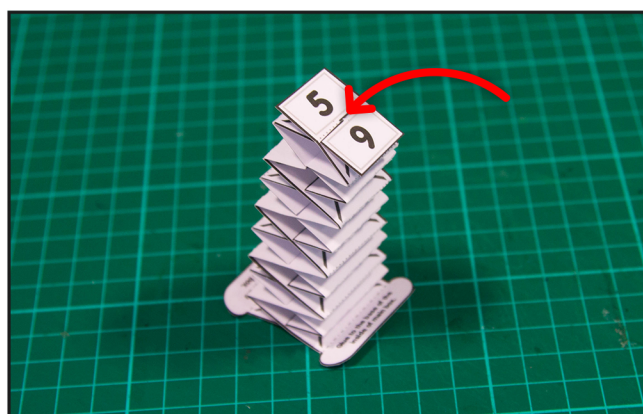

Fold along the dotted lines, following the key below.

- Fold Down
- Fold Up

Step 3

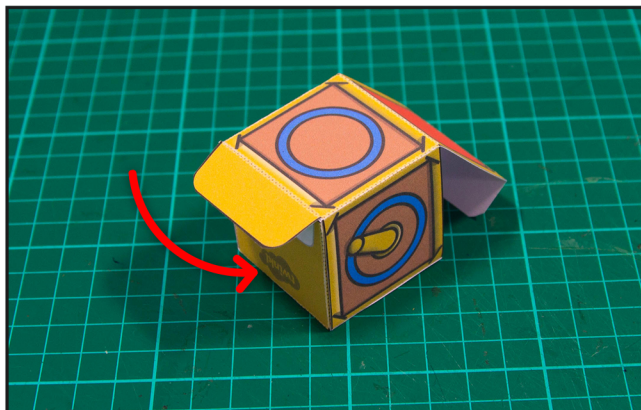

Slot the two long sections together as shown, so that they zigzag over one another.

Step 4

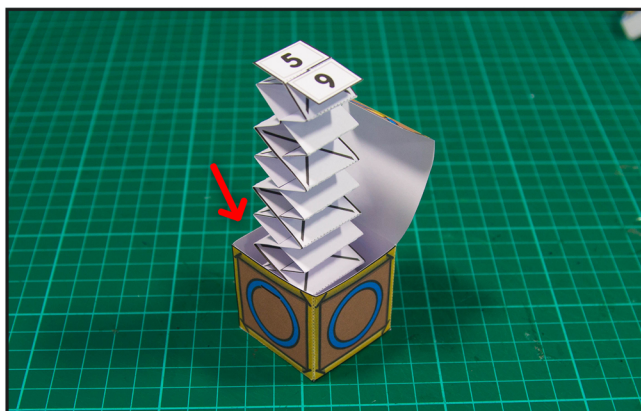

Compress the intertwined sections downwards, to form the spring as shown.

Jack in the Box Instructions

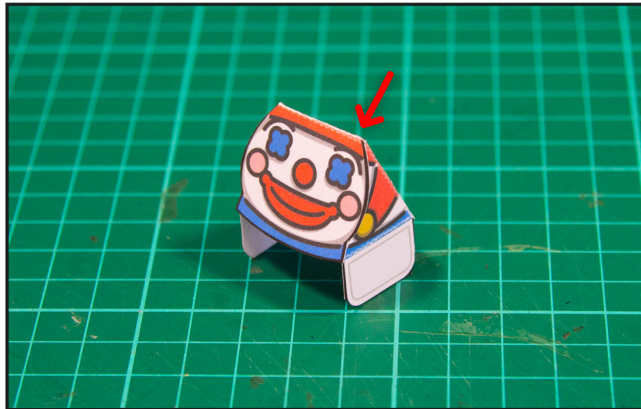

Step 5

Glue tab 1 down to the opposite side of the box, and then glue tabs 2 and 3 inside the box as shown. Then glue down tab 4.

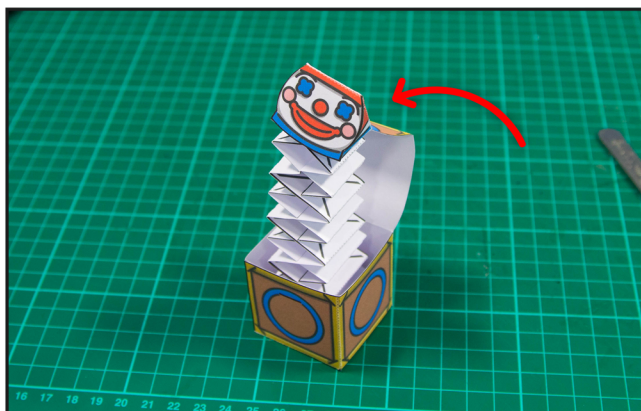

Step 6

Glue the spring to the bottom of the box as shown.

Step 7

Glue together the Jack's head as shown.

Step 8

Glue the head onto the top of the spring as shown.
