

P.E.

On Mondays we will be swimming each week and on Thursdays we will have our P.E lessons in school where we will be learning lots of new skills. Please come dressed on these days in the correct P.E uniform, which is a white t-shirt, a plain black/blue tracksuit and trainers . Please come with your hair tied back and remember to take out your earrings!

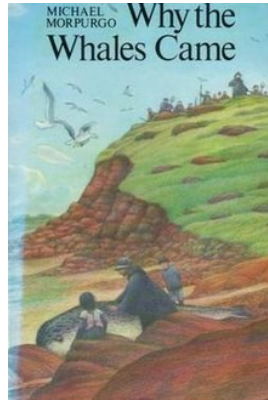

Writing

This term we will be writing to inform. We will be learning what a biography is and then following research , writing a biography about David Attenborough. After this, we will be looking at newspaper articles learning about their features and how they are written. We will then produce our own newspaper article informing you at home about our guitar workshop!

Reading

This term our class book will be by the famous author Michael Morpurgo. We will be finding out if Gracie and Daniel should listen to their parents warnings or if they decide to trust the birdman!

We will continue to visit the library weekly and the children are encouraged to select a book they would like to read from the wide variety on offer.

Children who attend RWI lessons will continue to bring home a RWI book alongside this and they should read this to an adult. Our weekly reading raffle will continue to reward regular readers, with the winners choosing a book to keep from the reading treasure box!

Our Value: Wisdom

Pilgrims Class Summer Term 2

We hope you all had a lovely week and are ready for some more adventures during our final term in Pilgrims Class!

This term we have a new topic entitled 'Predator' and we are certain that many of the children will also be eager to learn more about the impact humans are having on our world in our science lessons.

We have many exciting things planned for the term including a visit to the beach, guitar, clay and hula-hooping workshops! There will also be our annual sports day and our weekly swimming lessons to look forward to! Finally, we will be having a surprise visitor from an animal predator visiting us here at school !

R.E.

This term we will continue to learn about pilgrimages for people of different faiths and those who do not have a faith too. We will begin by looking at Kumbh Mela in the Hindu faith before finding out about the Muslim pilgrimage of Hajj. Finally we will discuss if people of no religion can also go on a pilgrimage and what the purpose of this would be.

Reminders...

Our class website has lots of information about what we are learning this term

www.bostonstnicholas.co.uk

If you need to contact us then you can email us directly through the class webpage.

Follow us on Twitter @StPilgrims

As the warmer weather comes please make sure children bring a water bottle each day and a sun hat! Don't forget to clearly name both so they can be brought back to the classroom if they are left outside!

Science

This term our learning will be about the impact humans have on living things in their habitats. In this unit we will learn about some of the positive and negative ways that humans change the environment, locally and globally, with a particular focus on how this affects other living things. When working scientifically we will plan and carry out a litter survey, using a tally chart to record data. We will group items into categories to make survey data manageable and present our findings by constructing and labelling pictograms and bar charts.

Homework

TTrockstars is our daily homework which should be completed by all children for at least 10 minutes each day (70 minutes over the week). This practice is essential for the children to increase their speed in answering times tables questions.

Daily reading is an expectation for all children. This can be a book from the library or something from home.. Children are encouraged to respond to their reading in their reading diaries.

Maths

Key Learning: Decimals

This term we will be focussing on developing our knowledge and understanding of decimals and money. This will involve children learning to:

- Recognise and write decimal equivalents of any number of tenths or hundredths
- Count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten.
- Find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths

Topic

This term our topic focuses on geography and D.T and is called 'Predator'. We will be comparing Sherwood forest with the Amazon rainforest, by looking at the climate, what lives there and how humans are impacting on these places. As part of this, we will be designing and making an accurate model of the rainforest and welcoming a real life predator into school for us to meet and observe! Please help us with this project by collecting any small cardboard boxes (shoeboxes would be perfect), and kitchen roll tubes. Please send these into school.
